

LATIN AMERICAN PERFINs are still largely unexplored, and there isn't even a worksheet for Peru. We do know, however, that there is an EH pattern which was used between 1929 and 1931 in Arequipa and a B.F.C. used in Lima on Scott 245, and a BM/AP used on Scott 214. All three items are in the collection of Bill Bladorn. Users? Bill doesn't know. We need more research in this area.
